

Tech-Tile (Access Plinth)

Tech-Tile is constructed from steel and specified for heavy grade raised floor loading. Its innovative design provides an easily installed rack cable access system that will fully maintain the safety standards of your structural raised floor. Tech-Tile offers a complete range of optional, and interchangeable, blanking plates and brush strips to assist you with your air flow control. We believe it is the first truly flexible approach to cable access requirements and all possible without the use of power tools or need for cutting.

Tech-Tile –No loss of tile strength from cutting, no mess, no power tools. It is simply a better way

Tech-Tile (Access Plinth) Patent No. 2 504 921
